CO-OPERATIVE SINCE 1977

Get the look with our  
ready-to-use refill units...

## Sustainable by Suma Get the look...

Whether you want to provide a refill revolution in your retail space, or want to diversify your current offering there is a Sustainable by Suma option available for your Zero Waste Station.

---

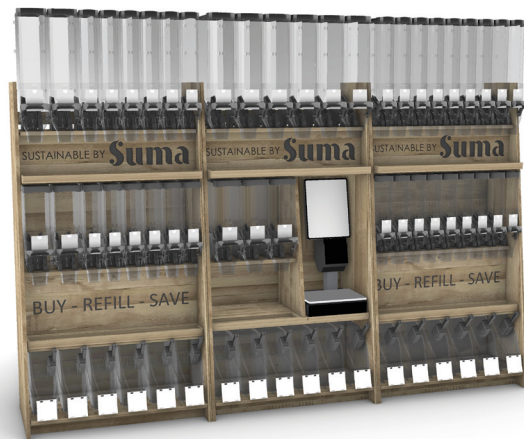

### Compact table top.

This compact 6 item unit includes a small gravity dispenser option which fits well on a counter or table top. We have one of these in our own canteen to keep our workers filled with our hearty muesli and porridge. They can be conveniently filled with our 3kg bagged commodities, leaving no waste. They also have easy to use display areas where batch information and ingredient labels can be shown. The gravity dispensers easily unhook from the main unit to allow for simple cleaning and refilling. They can sit side by side and at 67cm wide and less than a metre high, they really are the compact zero waste choice.

---

### Free standing units.

Three different free-standing units are available, which can stand alone or be used together to create an area as big as you need. Each unit is 1 metre wide and 2.23 metres high (including dispensers).
